

YOU CAN HELP KEEP YOUR DRIVER SAFE AND HEALTHY

The number one value at Papillion Sanitation has always been and always will be safety. As we navigate our way through the impact of COVID-19, we are working hard to minimize risk for our employees and customers while still providing the essential services that our communities rely on.

And you can help. Please try to place all of your trash into your carts and remember to bag and tie household trash. Trash that is not in the cart requires manual pick up, and improperly bagged and tied trash is susceptible to spills, which increases the risk of exposure for your driver to potentially infectious waste. Thank you for doing your part to keep your driver safe and healthy!
